Allowable Subject Matter

1. Claims 1-15 are allowed.

The following is an examiner's statement for reasons for allowance.

2. Claims 1 and 10 are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest a method of preventing the formation of loops within the network by executing a STP with a loop guard engine at the network device that prevents the given port of the network device from transitioning to the forwarding state if the given port is in a state other than the forwarding state or precludes the given port from forwarding or receiving network messages when the given port stops receiving a periodic BPDU message.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - US Patent (6697339) to Jain
 - US Patent (6188694) to Fine
